

West Toronto Ride for Renewables

What would our city look like if we powered it sustainably?

On October 4 Sustainability Ontario Community Energy Co-op invites the public to join its second annual bike tour of local green energy projects.

Starting at Steamwhistle Brewery and ending in the Junction, the co-op will lead a family-friendly tour of prominent and hidden renewable energy installations in the western part of Toronto.

The ride is part of Green Energy Doors Open, organized by the Ontario Sustainable Energy Association. It will provide an opportunity for residents to discover the possibilities of green energy in Ontario and to join the co-operative. Admission is free.

When: Saturday, October 4, 12:00 pm

Meeting point: Steamwhistle Brewery, 255 Bremner Blvd, Toronto, ON M5V 3M9

Registration and directions: <https://www.uniiverse.com/westto-rideforrenewables>

About Sustainability Ontario Community Energy Co-operative:

Sustainability Ontario Community Energy Co-operative was founded in the fall of 2012, in the International Year of Co-operatives, by a group of people passionate about community power. We are based in Toronto and are working to realize our first project. For more information go to www.sustainabilityontario.ca or contact us at info@sustainabilityontario.ca.
